# ASM

### *The goal of the project:*

The objective of this project is to create a dynamic ELF library to replace (to a certain extent) the standard C library you use every day on your system.

Here are the functions to be implemented in your MiniLibC:

- ✓ Strlen
- ✓ strchr
- ✓ memset
- ✓ memcpy
- ✓ strcmp
- ✓ memmove
- ✓ strncmp
- • strcasecmp
- • rindex
- • strstr
- • strpbrk
- • strcspn

***Creator:*** Yaowanart HURE. The project was made during my 2$^{nd}$ year at Epitech LILLE. First project made in ASM.

### How does it work?

You have to run as usual like in C program.
